locate-12

Compact GPS/GPRS tracking module with built-in GPS/GPRS antenna and high-performance rechargeable battery

Locate-12 reports the exact GPS position of vehicle, construction machinery, persons and other mobile objects etc. practically in real time.

The current position of the object to be tracked can be polled at any time by SMS or via the internet.

Locate-12 uses mobile data communication (GSM/GPRS/ SMS) to transfer tracking information.

The locate-12 tracking module was developed in Germany and is "Made in Germany".

Special features

High-performance on-board computer application v -locator. The functions of the on-board computer are particularly suitable for the following applications:

- **fleet-controlweb**
Log book and fleet management including geo-fence and alarms for a large number of reports and functions
- **MP-route**
The Microsoft map application MapPoint with interface to our M2M-commserver
- **FT-route**
The map application Fugawi Tracker with interface to our M2M-commserver. Particularly suitable for using your own map materials
