

Temp-sensor

Version 2.4

Inexpensive Temperature Sensor

Temp-sensor-03 is an inexpensive temperature sensor which can be attached to the remote control unit locate-29.

Temp-sensor-03 is fully supported by the locate-29 firmware as well as by the M2M-commserver and the web based driver logbook fleet-controlweb.

This 1Wire based external temperature sensor can measure temperatures from -55 to 125 degrees Celsius with a precision of 0.5 degrees Celsius. It comes with a 3 meter cable.

Locate-29

Even with an installed **temp-sensor-03** you still have access to both serial interfaces of the locate-29 unit without any restrictions.

Up to 16 temperature sensors can be connected at the same time and separately accessed by the application software running inside the locate-29 unit.

Product

Product	Part-No.	Description	Price
Temp-sensor-03	ZUB-05-03	temperature sensor including 3m cable; compatible with locate-29	89 Euro
