V-locatorcomfort

Vehicle Tracking and Theft Protection without Recurring Mobile Phone Costs

The v-locatorcomfort allows vehicle tracking and theft protection of mobile objects without recurring mobile phone costs.

The v-locatorcomfort receives GPS satellite information on a continuous basis and informs the owner of a vehicle immediately as soon as it detects, that the position of a vehicle changes unexpectedly.

Features

- You can call a phone number and enter the GPS position that was provided in an SMS by the v-locatorcomfort remote surveillance module. Then you will hear the current address of the vehicle.
- The package contains a route planning software and according map data that can be used to see the current position of a vehicle on a map.
- Emergency messages can be received thru SMS with your mobile phone or thru a phone call with every standard telephone.
- two handsets are included in the package that can be used to switch off and on the vehicle theft protection.
- You can switch on and off electronic devices remotely with a standard mobile phone or telephone (e.g. switching on a separate heating before you enter the car)
- You can connect thousands of sensors to receive reports as soon as one of the sensors changes its state or discovers an unusual situation.
- The package includes an LED to display the status of the vehicle theft protection (on/off)
