distance under control

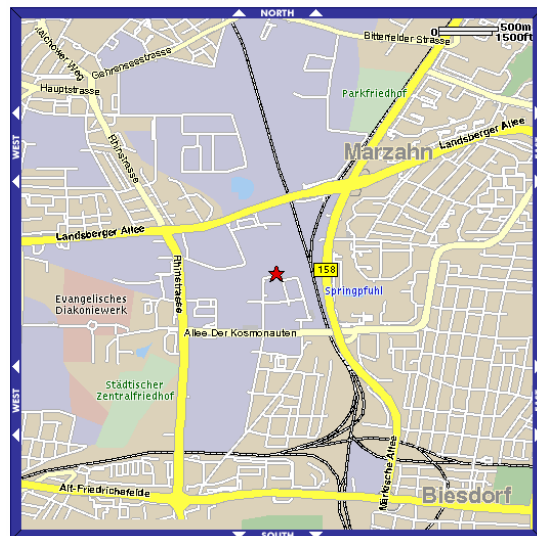

**Fleet-control<sub>web</sub>**  
Version 2.2

## Fleet Management and Driver Logbook for Small and Medium Sized Fleets

Our fleet-control<sub>web</sub> was designed for companies that operate vehicle fleets with 5 - 200 vehicles.

Handicraft Companies, Social Services, Security Services, Construction Machine Rental Companies, Transportation Companies and many other businesses have the possibility to track and trace their vehicles with our fleet-control<sub>web</sub>.

In addition, various reports like reports about driven routes, route details, pause times, driving behavior (speed, acceleration etc.), traffic jam situations and many more help to optimize the usage of the fleet and to bill the activities of the fleet.

★ **Current Position of the Vehicle**

Our fleet-control<sub>web</sub> recognizes the current geo position of a vehicle by receiving the very precise GPS satellite signals from one of our locate on-board-units nearly in real time thru the GSM mobile phone network.

There is no necessity to install or update any software on the computer of the user because fleet-control<sub>web</sub> is a web based application that only re-

quests a computer system connected to the internet and an installed browser like Microsoft Internet Explorer or Netscape.

## Feature List

- Multiple reports of the driven routes as well as the status of each vehicle are reported as follows:
  - Report about the actual position of each vehicle
  - Report about all driven routes of a vehicle
  - Report about all details of a driven route: when was which vehicle where, which speed had which vehicle when and where, how long was each part of a trip in regards of distance and time
  - Report about all pause times of each driver
  - Report about all stay times of each driver
  - Report about traffic jams during certain trips
  - Driver logbook (e.g. for tax authorities)
  - Graphics about the driving behavior of each driver
    - Positive and negative acceleration
    - speeding
  - Report about special incidents
    - When and where was the ignition switched on too long while the car was standing around
    - When and where was the vehicle driving faster than allowed
    - When and where was the voltage of the car battery below a certain level
  - And many more...

With fleet-control<sub>web</sub> you can configure to receive various reports on a revolving basis as an attachment to an E-Mail (e.g. every Friday at 14:45 hours)

With this feature you can save a lot of time and at the same time regularly needed reports will no longer be forgotten to be produced.

## Additional Features

**Mazore Trading Ltd. - Krinon 16 - 3110 Ekali – Limassol/Cyprus**

Sales and information: e-mail: [info@mazore.com](mailto:info@mazore.com) - website: [www.mazore.com](http://www.mazore.com)

Almere/The Netherlands tel: +31-36-5387090 - fax: +31-36-5387099

Oberhausen/Germany tel: +49-208-6986088 - fax: +49-208-6986087

- The current position of a vehicle can be displayed as an address or can be displayed as a symbol on a map (including a zoom feature down to street level).
- Storage of so called "named positions". With this feature it is possible, to name a certain geo coordinate (e.g. "office" or "soccer stadion").
- If named positions have been defined, these names will be used in all reports instead of addresses or geo coordinates. This allows quicker and easier reading of the reports.
- Die state of all digital inputs can be displayed. Also the voltage of the car battery. Digital inputs can be named (e.g. "Ignition" or "Crane")
- List generator: allows the design of own report templates.
- fleet-control<sub>web</sub> can be used on each PC connected to the internet with a standard internet explorer like Microsoft Internet Explorer, Mozilla or Netscape.
- All reports can be generated in PDF, XLS or CSV format and can be stored on your internet PC. The EXCEL- and CSV files can be changed with or used by appropriate programs. The PDF files are write protected.
